

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, April 20, 2021 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Initial attack activity:	Light (129 fires)
New large incidents:	2
Large fires contained:	1
Uncontained large fires: ***	2
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	1

Nationally, there is 1 fire being managed under a strategy other than full suppression.

***Uncontained large fires include only fires being managed under a full suppression strategy.

Ten Year Average Fires (2011 – 2020 as of today)	14,140
Ten Year Average Acres (2011 – 2020 as of today)	693,095

***Changes in some agency YTD acres reflect more accurate mapping or reporting adjustments.

***Additional wildfire information is available through the Geographic Areas at <https://gacc.nifc.gov/>

Predictive Services Discussion: A cold front will continue pushing south and east across the Plains and into the South while stalling out in the southern Great Basin. Lingering scattered precipitation is likely across the northern and central Plains with a surface low moving into the Ohio Valley with rain and snow behind the cold front and showers and thunderstorms ahead of it. Scattered rain and snow showers are also likely across parts of the Great Basin into northern California as well. Dry and windy conditions will overspread portions of the Southwest and southern California ahead of the cold front with drier conditions continuing in parts of the South.

LEAD Time

Leadership Environment

Leadership Category

Leadership is the act of influencing people to achieve a result. The leadership environment is made up of critical elements that a successful leader must consider in planning for effective action. Those critical elements are:

- You – the leader, who is ultimately responsible for all action and results.
- Your people – those who you are responsible for.
- Situation – comprised of the many unique variables that influence a leader's decision such as objectives, conditions, resources available, organizational influences, and others affected by the action.
- Consequences – the short- and long-term effects of your actions.

Leaders constantly assess the elements of the leadership environment and adapt accordingly. Successful leaders understand the interplay of these variables and demonstrate flexibility in selecting appropriate leadership tools and techniques as situations change.

Discussion Points:

- Each mission has a different level of risk. Discuss how the four leadership environment elements affect perceived risk in a changing environment.
- Each situation is unique and changes over time. Discuss what changes you might predict in your environment today.
- Discuss what leadership tools might be appropriate for those predicted changes today.
